

# Nava College Preparatory Health Project

## Illness/Disease/Condition

You will use Microsoft PowerPoint to make a presentation of common illnesses. The presentation will include a minimum of 3 illnesses/diseases/conditions. Each thread will have its own series of at least 3 slides and will include the following;

1. Title (name of illness/disease/condition) and a brief description/background
2. Bullet list of symptoms of the selected topic
3. Brief description/bullet list of treatment

Make sure to include pictures or graphics to help illustrate the presentation. All slides within a particular thread will have the same format (font, background color, layout, theme, transition, etc.)

Select 3 topics from the following list of Illness/Disease/Condition:

- Anemia
- Asthma
- Anorexia
- Alcohol Addiction
- Bulimia
- Concussion
- Diabetes
- Drug Addiction
- Hypertension
- Leukemia
- Obesity
- Osteoporosis
- Ovarian Cancer
- Prostate Cancer
- Sickle Cell Disease
- Sport Related Injuries (e.g. ACL Tear, MCL Tear, Shin Splints, Achilles Tendon Rupture...)
- Tuberculosis

Note: If a condition that you are eager to research is not listed, will require an approval by instructor.
